DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims **1-8**, drawn to a network system comprising a set of interface units for data transport, classified in class 370, subclass 360 (switching control).
 - II. Claims **9-15**, drawn to a network system comprising a set of logical data transport buses, classified in class 370, subclass 362 (Bus switch).
 - III. Claims **16-20**, drawn to a throughput maximization process for a network system, classified in class 370, subclass 231 (end-to-end flow control).

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a bus switch used to regulate bus transport capacity. See MPEP § 806.05(d).
3. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a throughput maximization process that regulates connection capacity based upon volume of dataflow associated with data buffers. See MPEP § 806.05(d).
4. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

shown to be separately usable. In the instant case, invention III has separate utility such as a throughput maximization process that regulates connection capacity based upon volume of dataflow associated with data buffers. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and the search required for one Group (I, II, or III) is not required for any other Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
